

Windward electronic submission info. – SEAPORT-E

Technical Capability:

Windward IT Solutions-www.windwardits.com

Windward IT Solutions, founded in 1997, is an operational management solutions firm for organizations that rely on their network and systems infrastructure as a key asset. Windward is headquartered in Herndon, Virginia and has staff and offices throughout the United States. Windward is a premier operational management consulting and systems engineering firm that has helped over 200 corporations and government agencies move in the right direction. Windward was incorporated in Northern Virginia to provide information technology services with a deep commitment to its clients and to its workforce. Soon, Windward was off and running after capturing significant regional bell operating companies as clients with projects to build their network management infrastructure. Windward expanded its customer base working with overseas clients in Ireland, Belgium and UK.

In 2007, Windward was recognized as a "Fast 50" company by both the Washington Business Journal and Washington Technology and was included on the 2007 Inc5000 list.
